

All Living Things and their Habitats

Key Vocabulary

Life Processes	These are the things that all living things do. They move, breathe, sense, grow, make babies, get rid of waste and get their energy from food.	Food Sources	This is the place a living thing's food comes from.
Living	Things that are living have all the life processes.	Habitat	A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.
Dead	Things that are dead were once living. They did have all the life processes but don't now.	Micro-habitat	A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats which have everything they need to survive.
Never Living	Things made out of metal, plastic or rock were never living. They never has the life processes.	Depend	Many living things in a habitat depend on each other. This means they need each other for different things.
Food Chain	A food chain show how each animal gets its food. Food chains are one of the ways that living things depend on each other to stay alive.	Survive	This means to stay alive.

Key Knowledge:

What are some examples of habitats?

What are the 'Life Processes'?

Use the acronym: MRS GREN

- Movement
- Respiration
- Sensitivity
- Growth
- Reproduction
- Excretion
- Nutrition

What is a food chain?

The arrow indicates 'eaten by'.

Can you identify if it is living, dead or never alive?

What is a Micro-habitat?

Prior Learning

Plant seeds and care for growing plants.
Understand the key features of the life cycle of a plant and an animal.
Begin to understand the need to respect and care for the natural environment and all living things.

Next Steps

Children will learn about different trees
Children will learn about vertebrates and invertebrates
